Rooms full of life.

nadura

Steinhart. Holzwarm.

Nadura. As hard as a rock. As warm as wood.

In a class of its own

our attention was drawn to wood powder, a new material made from wood and mineral substances early on. MEISTER was the first company in the world to develop an innovative manufacturing technology for series production in order to be able to offer entirely new floors based on wood powder. The name: Nadura.

The combination of a naturally warm material and a rock hard nature is fascinating. For this, fine wood fibres are mixed with mineral ingredients and compressed together using pressure and temperature.

The resulting material combines the best qualities of the two main components: the pleasant warmth of wood and the extreme toughness of rock.

Making innovative nadura floors from MEISTER an extremely durable and healthy living alternative to many ceramic, fine stoneware and PVC tiles.

The new flooring class.

nadura

Steinhart. Holzwarm.

Considerably different. **Considerably better.**

Nadura makes the difference: a floor that is similar to ceramic and fine stoneware in hardness and is fitted with the warm to the foot feel-good factor of wood. The innovative material allows for a whole range of surface versions that replicate elegant slate and sandstone or authentic wood structures. MEISTER even has a modern rust look in its range that replicates oxidising iron and yet feels cosy. Open up your rooms to a new dimension of design.

NB 400 | Light grey sandstone 6313 | Imitation

NB 400 | Slate anthracite 6220 | Imitation

Skirting board profile 8 PK | Slate anthracite 6220 | Imitation

Floors with a **unique character.**

A wooden floor for the kitchen? A stone floor in the bedroom? Durable and warm to the foot nadura floors for both rooms! As nadura plays to its individual strengths in any environment: just as tough as tiles and yet just as cosy as a wooden floor. Children's rooms, living rooms, guest rooms, hallways and studies all benefit from this.

NB 400 | Rustic wood dark brown 6303 | Wood effect

Skirting board profile 9 PK | Plain white gloss 324 | Decorative film

The intelligent recipe **for permanent pleasure.**

NB 400 | Slate grey 6221 | Imitation

It can happen very quickly, especially in the kitchen: a pot falls or a glass tips over. What leaves behind permanent traces on other floors is not even worth mentioning with MEISTER nadura floors: just clean it up and it's all forgotten. What remains are wonderful memories of cooking experiments, festive baking and family celebrations.

Peak loads?
Not a problem!

NB 400 | Warm grey structural concrete 6314 | Imitation

NB 400 | Warm grey structural concrete 6314 | Imitation

A floor for all eventualities.

The look also pays off in business. Besides the surface structure, the colour of the floor in particular influences the room's look. From light concrete look to authentic wood effects to dark slate, there is a selection of attractive colour varieties with nadura. At the same time, nadura floors are not just attractive – with wear class 34 they are also very forgiving when it comes to intensive wear.

NB 400 | Rust 6300 | Imitation

Wonderfully **convincing.**

This flooring always makes a statement and still fits perfectly into its environment. In modern rust look nadura exudes a pure industrial charm, in warm sandstone imitation it strikes a Mediterranean note. One thing always remains the same though: nadura can cope with any load in any place with its extreme abrasion resistance and durability.

NB 400 | Sandstone 6301 | Imitation

Nadura – definitely durable.

You can rely on your nadura flooring. It can withstand anything.

| The high share of mineral substances gives the floor the toughness of a stone or ceramic tile.

| Whereas ceramic tiles split or crack when subject to impact, with nadura only small dents or scratches result that can partly be repaired.

| The homogeneous surface coating is dyed right through and up to three times thicker than standard coated flooring.

Nadura. The tough version of a warm to the foot floor.

nadura

Steinhart. Holzwarm.

NB 400 | Slate anthracite 6220 | Imitation

Ceramic and fine stoneware tiles split or crack when subject to heavy impact. The alternative: Nadura flooring.

nadura

Steinhart. Holzwarm.

Stone and ceramic tiles on floors
are one thing above all: cool.
The alternative: Nadura flooring.

Nadura – pleasantly warm to the foot.

Nadura floors are also distinguished by their exceptional comfort and the warm to the foot nature of real wood floors.

| Due to the high share of wood fibres, body heat is drawn away slower than with ceramic or fine stoneware floors.

| Due to the share of mineral substances, nadura floors are just as tough as stone or ceramic tiles.

Nadura. The cosy version of a rock hard floor.

Nadura°– the favourite for cleaning **that forgives plenty.**

If only everything were as easy to clean as nadura flooring.

| Red wine, oils and other liquids can permanently discolour the necessary cement joints between stone and ceramic tiles.

They can be removed without a trace from the nadura joints.

| With nadura there are no partial repairs and resulting differences in colour as with cement joints.

Nadura. Because the joint makes the difference.

NB 400 | Sandstone 6301 | Imitation

Cement joints between tiles soak up liquids and oils and are often permanently discoloured. The alternative: Nadura flooring.

Nadura: even neat and
clean after heavy wear.

nadura

Steinhart. Holzwarm.

NB 400 | Rustic wood cream grey 6304 | Imitation

Nadura – flooring for rough stuff too.

Even wet clay and coarse dirt are easy to remove from nadura flooring without leaving any trace.

| Anti-slip, resistant to humidity and easy to clean°– nadura can even cope with heavier wear.

| Wet, coarse dirt can even be removed from the deeper surface structures as nadura is extremely scrub and abrasion resistant.

Nadura. For permanently beautiful floors.

Nadura – with the hardness of stone and the warmth of wood.

As with every MEISTER product, the reliable combination of innovation and craftsmanship quality goes into nadura. Resulting in products that leave nothing to be desired in terms of quality and long life. nadura itself is also the combination of the best properties.

The mix of natural materials and innovative workmanship result in flooring that is easy to clean, extremely abrasion resistant and also pleasantly warm to the foot. Its look is also impressive:

Deeply embossed 3D surface structures and modern decor make high-quality floors look deceptively real.

Authentic

The embossed 3D surface structures make nadura floors look very realistic. nadura is a natural product, each plank is a one-off.

Robust and unbreakable

Nadura remains durable even when subject to heavy mechanical wear. Visible signs of wear are characteristic with hard flooring, depending on wear. The homogeneous surface coating is up to three times thicker than standard coated flooring.

Anti-slip

The innovative surface combined with the embossed structure makes nadura floors very anti-slip. The Bergische Universität Wuppertal has classified it as having an anti-slip property of R9 | R10.

Material, properties and look°– three cheers for nadura.

Healthy living

Nadura consists of natural materials such as wood fibres and mineral substances. These guarantee environmentally friendly, healthy living.

Easy to clean

The innovative manufacturing technology makes the surface hard and durable. The floors allow for convenient and easy cleaning in living areas.

Nadura is the name for a completely new product category that is based on wood powder technology. Wood powder is an innovative, natural mix of materials consisting of wood fibres, mineral substances, colouring and additives. Resulting in floors that are extremely abrasion resistant and also pleasantly warm to the foot. Deeply embossed 3D surface structures give the floors an authentically real and first-class look. The homogeneous surface coating is up to three times thicker than standard coated floors and combined with our stable AquaSafe special board it is extremely tough.

Cross-section of a nadura element with heavily reinforced wear layer directly attached to a special board°– in an electron microscope.

Close examination of Nadura

The significantly reinforced wear layer consists of a special mix of wood fibres, mineral substances and colouring additives. It is applied onto a special AquaSafe board, which is based on a wood material. The final backing provides for stability.

Cross-section of laminate with a wear layer made of overlay, decor paper and HDF middle layer in an electron microscope.

Layered structure of laminate

Laminate elements are structured over several layers. The special sequence of individual layers ensures greater strength on the one hand and protects the decor paper due to the overlay on the surface on the other hand. The illustration clearly shows: the wear layer is thinner compared to the nadura element.

Award-winning!

Nadura from MEISTER.

Nadura® – produced under
license of Välinge

Nadura

Nadura is the name for a completely new product category that is based on wood powder technology. Wood powder is an innovative natural mix of materials consisting of wood fibres, mineral substances, colouring and other additives, which was developed by the Swedish company Välinge.

The Blue Angel

The result of our responsible choice of materials and modern production processes is that all nadura floors from MEISTER carry the Blue Angel® – the world's first and most well-known award for environmentally friendly products and services. This means you can be sure you are choosing a low-emissions, ecological product.

Institut Bauen und Umwelt e. V.

MeisterWerke Schulte GmbH supports sustainable building using environmental product declarations from the Institut Bauen und Umwelt e. V.

(Institute Construction and Environment (IBU) e.V.).

Declaration number: EPD-MWS-20130229-IBD1-DE

MEISTER warranty

We are so convinced of the quality of our nadura flooring that we give you a lifetime warranty on surface wear in private living areas. You receive products from MEISTER which you will love for many, many years to come because they are so easy to clean and have such a high-quality appearance and excellent durability. A 10-year warranty applies to commercial areas.

Warranty according to the MeisterWerke warranty conditions at www.meister.com

General building supervision

Granted by the German Institute for Building Engineering (DIBt).

CE mark

All MEISTER nadura flooring complies with all basic European health and safety regulations.

MADE IN GERMANY

We are firmly rooted in our location and see it as much more than just the name of where we come from. For us, "Made in Germany" also means top quality standards. It is our daily challenge to meet these.

Welcome to MeisterWerke.

We have been passionately developing and making products for rooms full of life for many years. At our company headquarters in Rütten-Meiste, in the beautiful region of Sauerland, it is our daily challenge to perfect these and therefore ensure the greatest benefit for our customers.

Our love of innovation is evident in everything: in our huge range, in our company and in the way we work together. Always collaboratively and fairly but also purposefully and reliably. Our company motto is: a MeisterWerke masterpiece every day!

As a family-run company we also think about future generations. That's why respect for nature and natural resources is a matter of course for us. We place great importance on environmentally sound origin and short transport routes when choosing our materials. Independent test institutes verify that the materials used are harmless. Resulting in products that combine top quality, maximum comfort and a great feeling year after year. For your rooms full of life.

MEISTER

Innovative products and system solutions are always the result of teamwork at MeisterWerke.

The careful selection of materials and decor guarantees the best result.

Our products undergo extensive quality tests on their way to becoming the perfect interior design object.

Through and through – Innovation with quality.

Three things give nadura flooring
from MEISTER a particularly long life:

- 1 | The high-quality, carefully selected materials,
- 2 | The intelligent multi-layer construction and
- 3 | innovative production process.

Together with the dimensionally stable middle layer
used by us, this guarantees durable, beautiful products
for years, which are ideal for private homes and
commercial use.

Mastercllic Plus

Easy, fast and safe to install* – this applies to all our nadura
floors. Click systems that are configured to the floor's respective
characteristics and the planks' dimensions provide the proverbial

ease of installation. For example, the patented Mastercllic Plus end
connection, which was developed in our company and the tried and
tested longitudinal Uniclic connection.

- 1 | The flooring ends are lowered right next
to the neighbouring plank.

- 2 | After lowering, the flooring is not yet
locked at the ends.

- 3 | The tongue is only activated when the
next row is laid.

- 4 | This results in a secure connection.

Product structure

The unique properties of nadura floors are achieved by three layers bonded tightly together using pressure and heat. The core layer connects to the surface made from an extremely tough mix of wood and minerals. A special AquaSafe board made from special wood materials is used for the floors. nadura backing stabilises the construction.

Nadura flooring is also suitable for laying on subfloors with controlled hot water underfloor heating.

For the perfect finish°— details that simply match.

A perfect living atmosphere results when all the elements in a room are perfectly coordinated to one another.

The modern square shaped mouldings in many surfaces and the classic Hamburg skirting board can be combined with all floors and harmoniously round off the overall impression.

Skirting boards

This skirting board is covered with identical material to the nadura floors and is therefore extremely durable. The top edge is also covered with a stainless steel decorative film.

Skirting board profile 8 PK (50mm)

Skirting board profile 9 PK (80mm), profile 8 PK (50mm)

Skirting board profile 13 PK (120mm), 12 PK (100mm),
11 PK (80mm), profile 10 PK (60mm)

Hamburg skirting boards

The elegant classic among skirting boards can be combined with any floor.

You can find the whole accessories range at www.meister.com.

Beautiful and also intelligent? **It is possible!**

It could be easy to lose track of the many excellent properties the MEISTER nadura floors have – but you don't have to. We have allocated a symbol to every property that makes it easier for you to find your way around.

Durable

thanks to homogeneous high-tech surface
